Search

- Cornerstone of the new ADS services
- ADS Classic vs SOLR search
 - Size vs speed vs functionality
- Solved problems
- Un(re)solved challenges

Microservices

- Architecture overview
 - Monolithic vs domain-oriented
 - Local vs distributed
- Challenges
 - Reliability (user expectations)
 - Complexity (cost)
- Future

Microservices cont.

API

- If it works everything is great, when it doesn't ...
- Industry standards
 - HTTP, JSON, OAuth (permissions/privileges)
- What we learned
 - #users
 - #requests
- What is more important?
 - User interface
 - New services (spinoffs)
 - Robots, crawlers

User Interface

- Architecture and few why's
- Was it meant to be pretty?
 - We have to work hard to stay focused NOT on the picture
 - UX vs strictly functional
- Statistics/adoption
- Future opportunities
